

RRFSS 2014: Tobacco Cessation

Figure 1

Percent of current smokers (18+) who are seriously considering quitting in the next 6 months or who are seriously considering quitting within the next 30 days, but have not quit smoking for one day or longer during the past year, HKPR District, 2014

Sample Size: 206
 *High Variability; Interpret with caution
 **Data not released
 Data Source: RRFSS (Jan-Dec, 2014), HKPR District Health Unit and Institute for Social Research (ISR), York University.

Table 1. The percent of adults (18 years+) who are seriously considering quitting in the next 6 months or who are seriously considering quitting within the next 30 days, but have not quit smoking for one day or longer during the past year, HKPR District, 2014.

Response	Percent	Lower 95% CI	Upper 95% CI
Yes	43.0	35.80	50.57
No	57.0	49.43	64.20

Interpretation†:

The percent of adult (18 years+) smokers, residing in the HKPR District, who are seriously considering quitting in the next 6 months or who are seriously considering quitting within the next 30 days, but have not quit smoking for one day or longer during the past year is 43.0% (95% CI: 35.80, 50.57).

RRFSS 2014: Tobacco Cessation

Figure 2

Percent of current smokers (18+) who are seriously considering quitting in the next 6 months or who are seriously considering quitting within the next 30 days, but have not quit smoking for one day or longer during the past year, by sex, HKPR District, 2014

Sample Size: 206

*High Variability: Interpret with caution

**Data not released

Data Source: RRFSS (Jan-Dec, 2014), HKPR District Health Unit and Institute for Social Research (ISR), York University.

Table 2. The percent of adult (18 years+) smokers who are seriously considering quitting in the next 6 months or who are seriously considering quitting within the next 30 days, but have not quit smoking for one day or longer during the past year, by sex, HKPR District, 2014.

Sex	Response	Percent	Lower 95% CI	Upper 95% CI
Male	Yes	46.2	35.20	57.73
Female	Yes	40.4	31.16	50.28
Male	No	53.8	42.27	64.80
Female	No	59.6	49.72	68.84

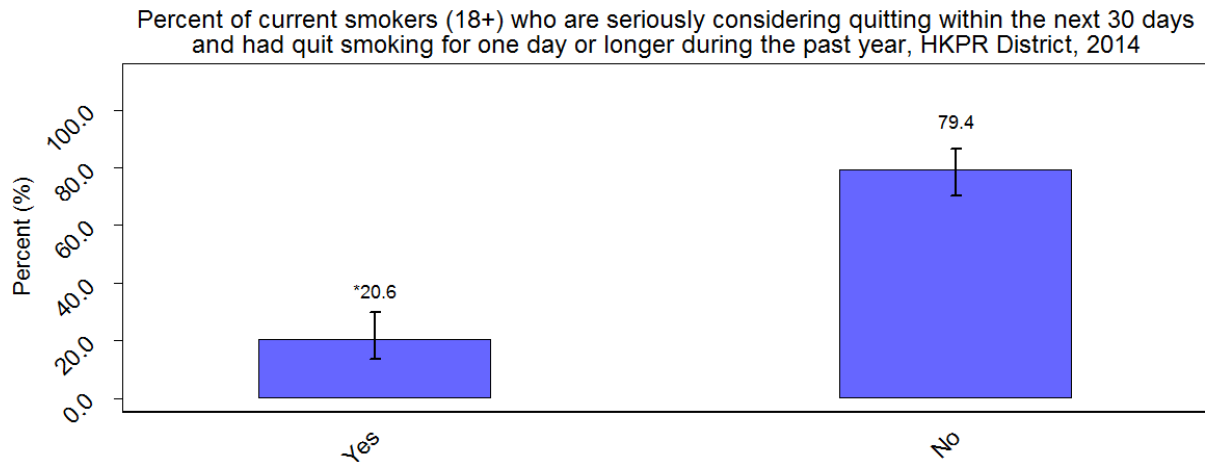

Interpretation†:

The percent of male smokers (18 years+), residing in the HKPR District, who are seriously considering quitting in the next 6 months or who are seriously considering quitting within the next 30 days, but have not quit smoking for one day or longer during the past year is 46.2% (95% CI: 35.20, 57.73).

The percent of female smokers (18 years+), residing in the HKPR District, who are seriously considering quitting in the next 6 months or who are seriously considering quitting within the next 30 days, but have not quit smoking for one day or longer during the past year is 40.4% (95% CI: 31.16, 50.28).

RRFSS 2014: Tobacco Cessation

Figure 3

Sample Size: 137
 *High Variability; Interpret with caution
 **Data not released

Data Source: RRFSS (Jan-Dec, 2014), HKPR District Health Unit and Institute for Social Research (ISR), York University.

Table 3. The percent of current smokers (18 years+) who are seriously considering quitting within the next 30 days and had quit smoking for one day or longer during the past year, HKPR District, 2014.

Response	Percent	Lower 95% CI	Upper 95% CI
Yes	*20.6	13.59	29.85
No	79.4	70.15	86.41

Interpretation†:

The percent of current smokers (18 years+), residing in the HKPR District, who are seriously considering quitting within the next 30 days and had quit smoking for one day or longer during the past year is 20.6% (95% CI: 13.59, 29.85).

RRFSS 2014: Tobacco Cessation

Figure 4

Percent of current smokers (18+) who are seriously considering quitting within the next 30 days and had quit smoking for one day or longer during the past year, by sex, HKPR District, 2014

Sample Size: 137

*High Variability: Interpret with caution

**Data not released

Data Source: RRFSS (Jan-Dec, 2014), HKPR District Health Unit and Institute for Social Research (ISR), York University.

Table 4. The percent of current smokers (18 years+) who are seriously considering quitting within the next 30 days and had quit smoking for one day or longer during the past year, by sex, HKPR District, 2014.

Sex	Response	Percent	Lower 95% CI	Upper 95% CI
Male	Yes	*18.6	9.51	33.37
Female	Yes	*22.2	13.03	35.27
Male	No	81.4	66.63	90.49
Female	No	77.8	64.73	86.97

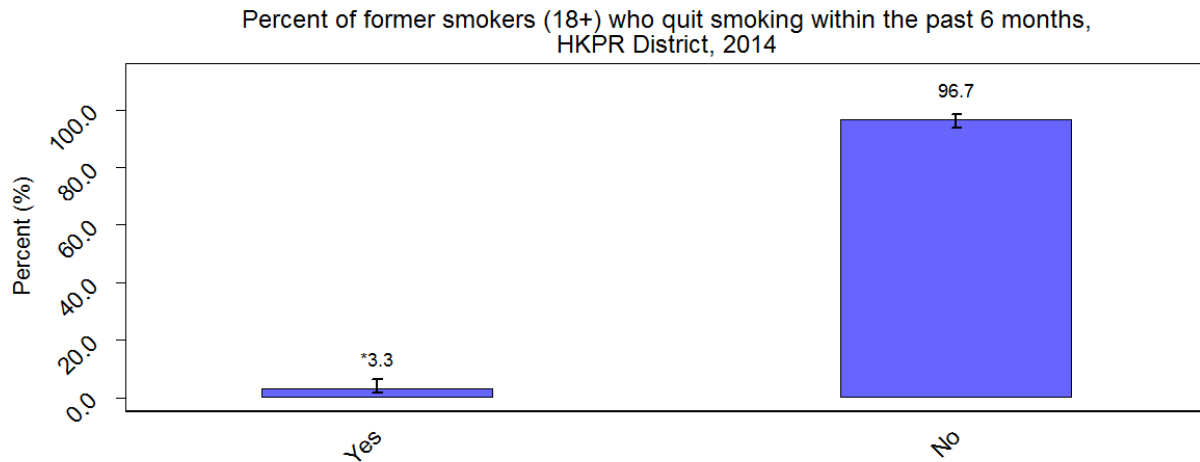

Interpretation†:

The percent of male current smokers (18 years+), residing in the HKPR District, who are seriously considering quitting within the next 30 days and had quit smoking for one day or longer during the past year is 18.6% (95% CI: 9.51, 33.37).

The percent of female current smokers (18 years+), residing in the HKPR District, who are seriously considering quitting within the next 30 days and had quit smoking for one day or longer during the past year is 22.2% (95% CI: 13.03, 35.27).

RRFSS 2014: Tobacco Cessation

Figure 5

Sample Size: 437
 *High Variability; Interpret with caution
 **Data not released
 Data Source: RRFSS (Jan-Dec, 2014), HKPR District Health Unit and Institute for Social Research (ISR), York University.

Table 5. The percent of former smokers (18 years+), who quit smoking within the past 6 months, HKPR District, 2014.

Response	Percent	Lower 95% CI	Upper 95% CI
Yes	*3.3	1.75	6.31
No	96.7	93.69	98.25

Interpretation†:

The percent of former smokers (18 years+), residing in the HKPR District, who quit smoking within the past 6 months is 3.3% (95% CI: 1.75, 6.31).

RRFSS 2014: Tobacco Cessation

Data Limitations:

1. Questions are only asked of adult residents aged 18+.
2. The telephone survey is only conducted in English.
3. Results are based on self-reported behaviours.
4. (*) indicates that results are based on small sample size; thus, estimates have high variability.
5. (**) indicates the data is not released due to small sample size.

Data Notes:

1. Source: Rapid Risk Factor Surveillance System (RRFSS), Jan-Dec 2014, Haliburton, Kawartha, Pine Ridge (HKPR) District Health Unit and Institute for Social Research (ISR), York University.
2. Missing responses are not included in the analysis.
3. "Do not know" and "Refused" responses are analyzed according to RRFSS Analysis Guidelines.
4. The 95% confidence intervals (95% CI) are the range of variability for a population estimate. There is a 95% probability that the true estimate is within that range.
5. Release criteria of the data are according to RRFSS Analysis Guidelines.
6. Percent across age-groups will not sum to 100% as the responses are analyzed within each age-group.
7. If the 95% confidence intervals of estimates do not overlap, the estimates are significantly different (i.e., if the lower confidence interval of estimate A is > the upper confidence interval of estimate B, the estimates are statistically significant). However, if confidence intervals do overlap, it is not necessarily true that estimates are not different.
