

## Haliburton, Kawartha, Pine Ridge District Health Unit RRFSS (2007) Flu Immunization

Proportion of adults (18+) who report getting a flu shot since September 2006, RRFSS  
January - April 2007

**Table 1: Flu Immunization (overall)**

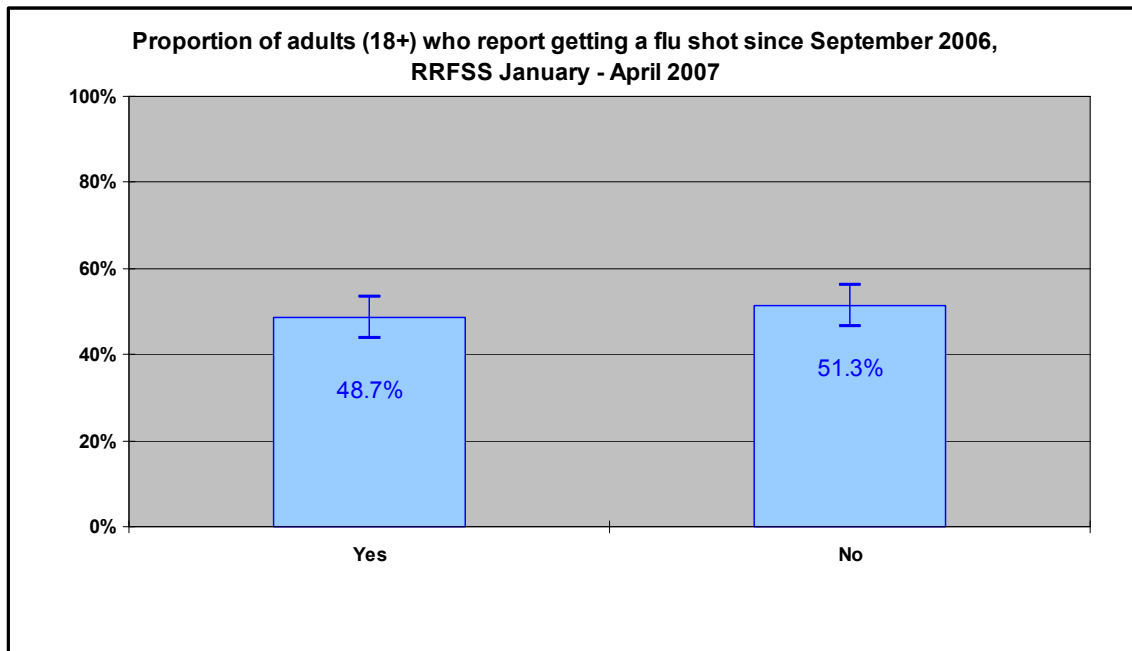

Flu shot	Proportion	95% upper confidence limit	95% lower confidence limit
Yes	48.7%	53.6%	43.8%
No	51.3%	56.2%	46.4%

\* Interpret with caution, high variability

\*\* Data not released

sample size 402

**Figure 1: Flu Immunization (overall)**

**Interpretation:**

48.7% (+/-5%) of adults (18+) reported getting a flu shot since September 2006.

51.3% (+/-5%) of adults (18+) reported not receiving a flu shot since September 2006.

**Proportion of adults (18+) who report getting a flu shot since September 2006, by sex, RRFSS January - April 2007**

**Table 2: Flu Immunization (by sex)**

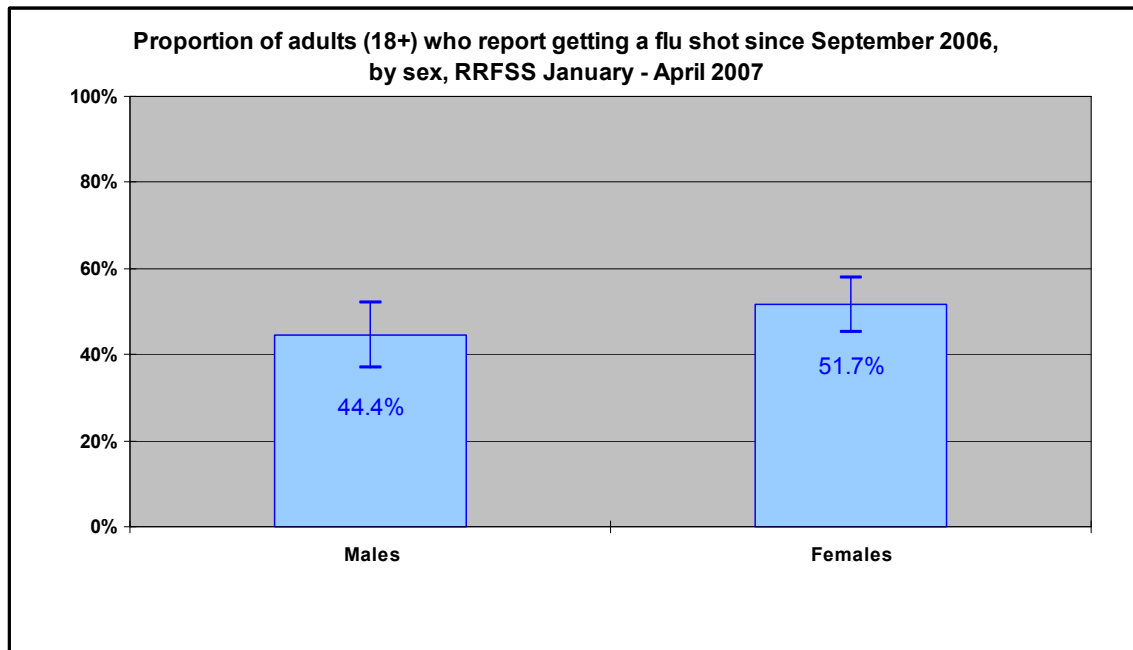

Flu shot	Proportion	95% upper confidence limit	95% lower confidence limit
<b>Males</b>	44.4%	52.1%	36.8%
<b>Females</b>	51.7%	58.0%	45.3%

\* Interpret with caution, high variability

\*\* Data not released

sample size 402

**Figure 2: Flu Immunization (by sex)**

**Interpretation:**

44.4% (+/-8%) of adult males (18+) reported getting a flu shot since September 2006.

51.7% (+/-6%) of adult females (18+) reported getting a flu shot since September 2006.

**Proportion of adults (18+) who report getting a flu shot since September 2006, by age, RRFSS January - April 2007**

**Table 3: Flu Immunization (by age)**

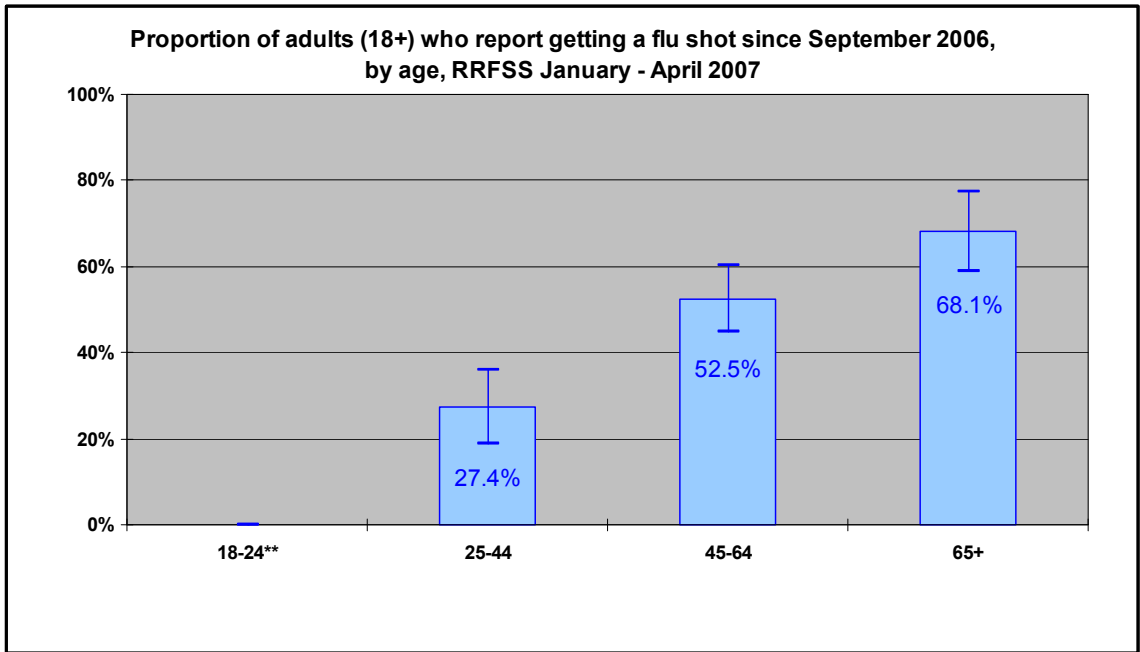

Flu shot	Proportion	95% upper confidence limit	95% lower confidence limit
<b>18-24**</b>	**	**	**
<b>25-44</b>	27.4%	35.9%	18.8%
<b>45-64</b>	52.5%	60.2%	44.9%
<b>65+</b>	68.1%	77.4%	58.8%

\* Interpret with caution, high variability

\*\* Data not released

sample size 383

**Figure 3: Flu Immunization (by age)**

**Interpretation:**

27.4% (+/-9%) of adults (age 25-44) reported getting a flu shot since September 2006.

52.5% (+/-8%) of adults (age 45-64) reported getting a flu shot since September 2006.

68.1% (+/-9%) of adults (age 65+) reported getting a flu shot since September 2006.

**Proportion of adults (18+) who report getting a flu shot since September 2006, by education, RRFSS January - April 2007**

**Table 4: Flu Immunization (by education)**

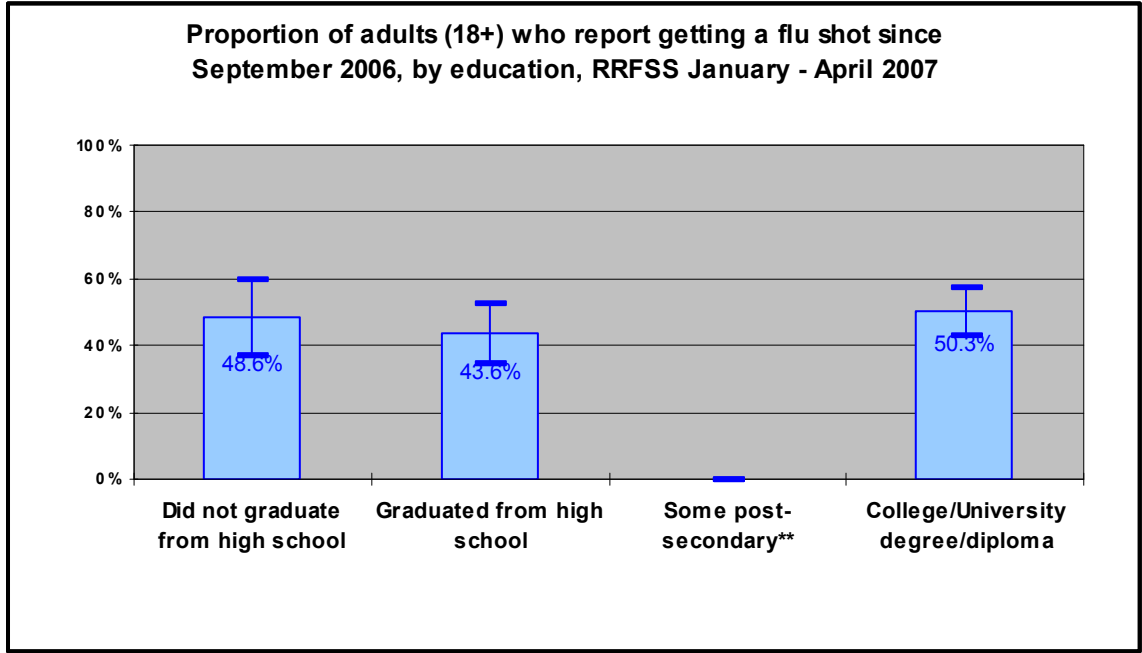

Flu shot	Proportion	95% upper confidence limit	95% lower confidence limit
Did not graduate from high school	48.6%	60.0%	37.2%
Graduated from high school	43.6%	52.6%	34.6%
Some post-secondary**	**	**	**
College/University degree/diploma	50.3%	57.8%	42.8%

\* Interpret with caution, high variability

\*\* Data not released

sample size 398

**Figure 4: Flu Immunization (by education)**

**Interpretation:**

48.6% (+/-11%) of adults (18+) who have not graduated from high school reported getting a flu shot since September 2006.

43.6% (+/-9%) of adults (18+) who have graduated from high school reported getting a flu shot since September 2006.

50.3% (+/-7%) of adults (18+) who have completed a college or university degree or diploma reported getting a flu shot since September 2006.

**Limitations:**

1. Questions only asked of adult residents aged 18+.
2. Telephone survey only conducted in English.
3. Results are based on self-reported behaviours.
4. (\*) indicates that results are based on small sample size, thus estimates have high variability.

**Notes:**

- 1) The numbers in the tables and graphs are weighted.
  - 2) Missing responses are not included in the analysis.
  - 3) Don't know and refused responses are analyzed according to RRFSS analysis guideline.
  - 4) Release criteria of the data are according to RRFSS analysis guideline.
- \* Interpret with caution, high variability.  
\*\* Data not released.
