

Haliburton, Kawartha, Pine Ridge District Health Unit RRFSS 2006 (Jan-Dec) - Pesticide effect on Health and environment

Proportion of adults (18+) who are aware of the effect of pesticides on Environment, RRFSS 2006 (Jan-Dec)

Being aware of effect on environment	Proportion	95% upper confidence limit	95% lower confidence limit
Positive effect	14.5%	16.4%	12.5%
Negative effect	85.5%	87.5%	83.6%
Sample size:		1193	

Interpretation:

- 14.5% (+/-2.0%) adults (age 18+) said that pesticides have a positive effect on environment
- 85.5% (+/-2.0%) adults (age 18+) said that pesticides have a negative effect on environment
- ** data not released for adults who did not know the answer or refused to answer due to small cell size

Limitations:

1. Questions only asked of adult residents, aged 18+
2. Telephone survey only conducted in English
3. Results are based on self-reported behaviors.
4. (*) indicates that results are based on small sample size, thus estimates have high variability.

Notes:

- 1) The numbers in the tables and graphs are weighted.
 - 2) Missing responses are not included in the analysis.
 - 3) Don't know and refused responses are analyzed according to RRFSS analysis guideline.
 - 4) Release criteria of the data is according to RRFSS analysis guideline.
- * Interpret with caution, high variability
** Data not released.
