

## Haliburton, Kawartha, Pine Ridge District Health Unit RRFSS 2006 (Jan-Dec) - Pesticide effect on Health and environment

Proportion of adults (18+) who are aware of the effect of pesticides on human health, RRFSS 2006 (Jan-Dec)

Being aware of effect on human health	Proportion	95% upper confidence limit	95% lower confidence limit
Positive effect	11.7%	13.5%	9.9%
Negative effect	88.3%	90.1%	86.5%

Sample size: 1193

### Interpretation:

11.7% (+/-1.8%) adults (age 18+) said that pesticides have a positive effect on human health  
 88.3% (+/-1.8%) adults (age 18+) said that pesticides have a negative effect on human health

\*\* data not released for adults who did not know the answer or refused to answer due to small cell size

### Limitations:

1. Questions only asked of adult residents, aged 18+
2. Telephone survey only conducted in English
3. Results are based on self-reported behaviors.
4. (\*) indicates that results are based on small sample size, thus estimates have high variability.

### Notes:

- 1) The numbers in the tables and graphs are weighted.
- 2) Missing responses are not included in the analysis.
- 3) Don't know and refused responses are analyzed according to RRFSS analysis guideline.
- 4) Release criteria of the data is according to RRFSS analysis guideline.

\* Interpret with caution, high variability

\*\* Data not released.
