

Emergency Management 6.10.10 (Revised)

- Legislation section added
- Update of terms, titles, names, and resources to reflect those currently in use.

Emergency Rapid Notification System 6.10.30 (Revised)

- Name changed from Emergency Management Response System (ERMS) to Emergency Notification System to reflect the ministries change from the ERMS system to RAVE system.
- Notification system more closely reflects the requirement for a rapid notification system to reach employees.
- Now specifies Corporate Services as responsible for the RAVE system, testing, and updating of data. Emergency Management Coordinator was previously responsible for testing, although this was not identified in the policy. Due to contact details and need to follow-up with outdated numbers, testing aligns well with Human Resources and not Emergency Management.
- Additional uses of the system were included.
- No changes to employee requirement to provide personal contact numbers and to inform Human Resources of any changes.
